DIRK KEMPTHORNE
Governor

KARL J. DREHER
Director

April 19, 2002

Steve Hebdon
2924 Kelley Toponce Rd.
Bancroft, ID 83217

Dear Steve,

Attached is a hard copy listing of water rights within Water District 29 (upper Portneuf River and tributaries). I discussed getting you this listing when we met last week in Soda Springs. I apologize for the slight delay in getting this information to you.

You will note that there are actually two separate listings attached, one is a listing of rights on the main stem of the Portneuf River and one is a listing of rights on the tributaries. The main stem listing is sorted by priority date and includes Snake River Basin Adjudication (SRBA) claims and recommendations as well as the pre-SRBA original decreed and licensed water rights. You will note therefore that a number of rights may be repeated because the list includes either a claimed or recommended version from the SRBA plus the original water right. Note that the *Source Table* column of the list shows whether the right listed is an adjudication claim (*wrAdjudicationClaim*), recommendation (*wrAdjudicationRecommendation*) or original decreed, licensed or beneficial use/statutory claim right (*wrWaterRight*). You will note also that this list includes the point of diversion locations, hence some water rights will also be repeated on the list if there are multiple points of diversion for the right.

The listing of tributary rights is similar to the main stem river listing except that it is sorted first by source, and then by priority date, although post 1900 rights are listed before pre-1900 rights due to the way our computer program outputs priority dates (this is really more of a problem associated with sorting dates in Microsoft Excel). I could have corrected this problem by doing a lot of cutting and pasting but I really did not have adequate time to complete that task.

Please note also that I have identified both listings of rights as "Preliminary". I have reserved this designation due to the fact that I included SRBA claimed and recommended rights. I believe it is important to include the SRBA claims and recommendations since those rights include current or updated information with respect to water right owners and points of diversion etc. Please note also that a number of water rights claimed or recommended in the SRBA have been combined and/or renumbered from the original decreed and licensed rights. I have included a column on the main stem listing that identifies an SRBA claim or recommendation that has been renumbered from the original rights.

Since the SRBA claimed and recommended rights in Basin 29 have not yet been published in a Director's Report or decreed by the SRBA court, you must deliver water rights in accordance with the original decree, licenses or beneficial use claims on record with IDWR. As mentioned above, all original decreed rights, licenses and statutory claims in the attached lists are given a *wrWaterRight* designation under the *Source Table* column. As explained in the IDWR Watermaster Handbook, all statutory claims must be turned off or not delivered when the watermaster begins regulating diversions by water right priority dates.

Please review the attached lists carefully and address any concerns or questions you may have concerning this information to either me, or Harold Jones at our Idaho Falls office. Al Rueberry or Cindy Bird, both with the IDWR Adjudication Bureau, may also provide assistance to you since they are currently investigating the SRBA claims in your district and are familiar with the water rights and diversions in the area.

Again, I am still planning on making a visit to the district either the first or second week of May. I will call you when I know which dates will work best for me.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Tim Luke', with a stylized flourish at the end.

Tim Luke
Water Allocations

Enclosure
